Code No. N0524 **R07** **Set No.1**

IV B.Tech I Semester Regular Examinations, November, 2011

MULTIMEDIA AND APPLICATION DEVELOPMENT

(Common to Computer Science & Engineering and Information Technology)

Time: 3 hours **Max. Marks: 80**

Answer any FIVE Questions
All Questions carry equal marks
****

1. Write about YUV color model in detail and also explain where this model is used.

2. a) Discuss about MIDI
   b) Explain in detail about analog video signals

3. a) Explain Data type 'type checking' in AS2.0
   b) Explain Class Attributes AS 2.0

4. Explain the usage of Interface in AS2.0

5. Explain about the Nested Assets are not automatically recognizes by Compiler

6. a) Write about Arithmetic Coding algorithm.
   b) How Trees are used in the compression technique. Explain?

7. Explain How MPEG -7 works.

8. Explain TCP/IP protocols of multimedia networks?

IV B.Tech I Semester Regular Examinations, November, 2011

MULTIMEDIA AND APPLICATION DEVELOPMENT

(Common to Computer Science & Engineering and Information Technology)

Time: 3 hours **Max. Marks: 80**

Answer any FIVE Questions
All Questions carry equal marks
****

1. Write about the RGB cube and CMY cube.

2. a) Write about quantization and transmission of audio.
   b) Explain all types of video signals.

3. a) Explain Class Attributes AS 2.0
   b) Write about static checking. Give examples

4. What is reusability? How that is achieved? Give an example program in AS.

5. Explain the Currency Converter Class with an example.

6. a) What are the two types of wavelet transforms?
   b) Compare dictionary based coding with lossless image compression?

7. Discuss about
   i) MELP (multiband excitation linear predictive)
   ii) MPEG-7 DDL (description definition language) components?

8. Explain about Multimedia network communications and also discuss about its applications?

IV B.Tech I Semester Regular Examinations, November, 2011

MULTIMEDIA AND APPLICATION DEVELOPMENT

(Common to Computer Science & Engineering and Information Technology)

Time: 3 hours **Max. Marks: 80**

Answer any FIVE Questions
All Questions carry equal marks
****

1. a) Explain different file formats
   b) Discuss the categorist multimedia Software's.

2. What is differential pulse code modulation? In what way it is differed from predictive coding

3. a) Differentiate function and method in ACTION SCRIPT
   b) Write about static checking. Give examples

4. What is Interface? Explain the need of interfaces with a suitable example

5. a) write about run-length coding algorithm
   b) Explain the how to design the currency converter frame work

6. a) Compare dictionary based coding with lossless image compression?
   b) What is the idea behind embedded zero three of wavelet coefficient?

7. Discuss about
   a) Video Compression Techniques
   b) Audi Compression Techniques

8. Explain broad cast schemes for video on demand in detail?

100% free SMS:- ON<space>UandiStar to 9870807070 for JNTU, Job Alerts, Tech News , GK News directly to ur Mobile

IV B.Tech I Semester Regular Examinations, November, 2011

MULTIMEDIA AND APPLICATION DEVELOPMENT

(Common to Computer Science & Engineering and Information Technology)

Time: 3 hours **Max. Marks: 80**

Answer any FIVE Questions
All Questions carry equal marks
****

1. a) Discuus about Data represention in Graphics and images.
   b) What is WWW? Explain in brief.

2. What is NTSC video? Write about luminance(y) and chrominance signals in NTSC.

3. a) Explain about object oriented ACTION SCRIPT.
   b) Differentiate function and method in ACTION SCRIPT

4. What do you mean by uncaught exceptions? Explain how handle un caught exceptions.

5. a) Explain subclasses of Movie clip type.
   b) Discuss about wavelet-based coding algorithm.

6. Discuss about
   a) Quantization algorithm
   b) LZW Algorithm

7. a) What is MPEG-2? Explain about MPEG-2 Scalabilities?
   b) Discuss examples on use of MPEG -4

8. a) Write short notes on media-on-demand (MOD)?
   b) Explain the operation of RTSP with example?
