Set No. 1

IV B.Tech. I Semester Regular Examinations, November 2010
NETWORK PROGRAMMING
(Common to Computer Science & Engineering and Information Technology)

Time: 3 Hours **Max Marks: 80**

Answer any FIVE Questions
All Questions carry equal marks
****

1. (a) Describe in detail about the steps and buffers when an application writes to TCP socket.
   (b) Explain about UDP in detail. [8+8]

2. (a) Give in detail about socket and different socket address structures.
   (b) Discuss different elementary TCP sockets in detail. [8+8]

3. (a) Explain in detail about TCP echo server.
   (b) Discuss about shut down of server host. [8+8]

4. (a) Discuss different I/O models in detail.
   (b) Under what conditions are socket descriptors ready for? [8+8]

5. (a) Discuss in detail about determining outgoing interface with UDP.
   (b) Write dg-cli function that writes a fixed number of datagrams to the server. [8+8]

6. (a) Discuss in detail about domain name server and entries in DNS.
   (b) Describe in detail about obsolete IPV6 address lookup functions. [8+8]

7. (a) Give description on name spaces for IPC.
   (b) Discuss about message queues in detail. [8+8]

8. (a) Discuss in detail about pseudo terminals and about recording process with pseudo terminals and about recording process with pseudo terminals.
   (b) Explain about control terminals in detail. [8+8]

Set No. 2

IV B.Tech. I Semester Regular Examinations, November 2010
NETWORK PROGRAMMING
(Common to Computer Science & Engineering and Information Technology)

Time: 3 Hours **Max Marks: 80**

Answer any FIVE Questions
All Questions carry equal marks
****

1. (a) Explain about TCP connection establishment and termination.
   (b) Discuss different UNIX standards in detail. [8+8]

2. (a)Discuss in detail about fork and exec functions in detail.
   (b) Explain in detail about byte ordering and manipulation functions. [8+8]

3. (a) Discuss in detail about termination of server process.
   (b) Discuss about crashing and rebooting of server host. [8+8]

4. (a) Describe in detail about getsockopt and setsockopt functions in detail.
   (b) Discuss in detail about poll function. [8+8]

5. (a) Explain in detail about UDP echo server.
   (b) Discuss in detail about lack of flow control with UDP. [8+8]

6. (a) Explain about network related information in detail.
   (b) Explain about elementary name and address conversions in detail. [8+8]

7. (a) Compare File locking Vs record locking.
   (b) Explain in detail about pipes with client server example. [8+8]

8. (a) Discuss in detail about rlogin .
   (b) Discuss in detail about RPC transparency issues in detail. [8+8]

Set No. 3

IV B.Tech. I Semester Regular Examinations, November 2010
NETWORK PROGRAMMING
(Common to Computer Science & Engineering and Information Technology)

Time: 3 Hours **Max Marks: 80**

Answer any FIVE Questions
All Questions carry equal marks
****

1. (a) Explain about TCP connection establishment and termination.
   (b) Discuss in detail standard internet services. [8+8]

2. (a) Explain in detail about connect and bind functions.
   (b) Describe in detail about concurrent servers. [8+8]

3. (a) Discuss in detail about handling SIGCHILD signal.
   (b) Give differentiation between wait and waitpid. [8+8]

4. (a) Compare different I/O models in detail.
   (b) Explain about batch input and shut down functions. [8+8]

5. (a) Explain about connect function with UDP.
   (b) Explain about outgoing interface with UDP. [8+8]

6. (a) Describe in detail about reentrant functions .
   (b) Explain in detail about gethostbyname functions. [8+8]

7. (a) Explain about system V IPC in detail.
   (b) What is a semaphore? Explain in detail about structure of information that maintained in kernel in detail. [8+8]

8. (a) Give an overview of recording in detail.
   (b) Explain about terminal modes in detail. [8+8]

Set No. 4

IV B.Tech. I Semester Regular Examinations, November 2010
NETWORK PROGRAMMING
(Common to Computer Science & Engineering and Information Technology)

Time: 3 Hours **Max Marks: 80**

Answer any FIVE Questions
All Questions carry equal marks
****

1. (a) Discuss in detail about protocol usage by common internet applications.
   (b) Describe about limitations of buffer sizes that affect the data on application can transmit. [8+8]

2. (a) Explain about connect and bind functions in detail.
   (b) Give in detail about relationship and differences among six exec functions. [8+8]

3. (a) Explain about connection abort before accept returns in detail.
   (b) Discuss in detail about SIGPIPE signal . [8+8]

4. (a) Explain in detail about select function.
   (b) Explain in detail about socket function . [8+8]

5. (a) Write dg-echo function in detail.
   (b) What is datagram? Write dg-cli function that verifies returned socket address. [8+8]

6. (a) Describe about gethostbyname functions in detail.
   (b) Explain about elementary name and address conversions in detail. [8+8]

7. (a) Discuss in detail file and record locking.
   (b) What is FIFO? Discuss in detail about FIFOs with a client/Server. [8+8]

8. (a) Discuss in detail about RPC transparency issues in detail.
   (b) Explain about terminal line disciplines in detail. [8+8]
